Kitchen considerations

When considering your kitchen project, it is important to think about a few important finishing details. Thinking about these aspects now will help us not only provide a more accurate quote but also make sure that the final result feels truly tailored to your style and needs.

1. Appliances

- Which appliances do you plan to keep, replace, or add (e.g., fridge, stove, dishwasher, microwave)?
- Are there any specific brands or models you prefer?
- Will you require any custom cabinetry or accommodations for appliance sizes?

2. Lighting

- What type of lighting are you looking for (e.g., task lighting, ambient lighting, under-cabinet lighting)?
- Will you be adding or updating ceiling lights, pendant lights, or recessed lighting?

3. Style

- What overall style do you envision for your kitchen (e.g., modern, traditional, farmhouse, minimalist)?
- Do you have specific materials or finishes in mind for cabinets, countertops, or backsplashes?

4. Layout

- Are you planning to keep the existing layout, or are you considering changes (e.g., moving appliances, altering the island or countertop configuration)?
- Do you need a more open-concept layout or specific zones for cooking, dining, and entertaining?

5. Flooring

- What type of flooring would you like (e.g., tile, hardwood, laminate)?
- Are there any special considerations, such as underfloor heating or moisture resistance?

6. Plumbing & Electrical

- Are there any changes needed to plumbing or electrical connections (e.g., moving the sink, adding more outlets)?
- Do you plan to install new fixtures like a pot filler or an additional sink?

7. Timing & Disruption

- What is your preferred timeline for the project's start and completion?
- Are there specific dates or periods of time when you want to avoid construction due to personal commitments?
- How will you manage daily life during the renovation? Do you need assistance in minimizing disruption?

Additional Considerations:

Are there any structural changes (e.g., removing walls) that you are considering?

Any other custom features (e.g., built-in storage, pantry space, smart technology)?
